CITY OF
Crystal Lake
ILLINOIS

April 29, 2019

North Shore Study Area Resident

Dear Resident:

The City of Crystal Lake would like to invite you and your neighbors to review the engineering plans for the North Shore flooding improvement project. The proposed project will add storm sewer within the public right-of-way along East End Avenue, Greenfield Road and Crystal Beach Avenue as well as along North Shore Drive. The project will replace the existing storm sewer outfalls to the Lake located on the Homeowners Association's "Mooring Beach" and "Swim Beach." A map showing the impacted areas is attached.

The goal of the meeting is to obtain your concurrence and additional feedback regarding the plans prior to proceeding with selection of a contractor later this summer. If you reside along East End Avenue, Greenfield Road or Crystal Beach Avenue, staff would also appreciate your input regarding the location of a proposed storm sewer access point in the right of way that will be installed for each house. This access point will allow you to tie in sump pumps or yard drains after the new City storm sewer is installed. If you reside along these streets, please review and/or verify the location of any sump pump or storm water discharge locations on your property prior to the meeting so we can discuss these locations with you.

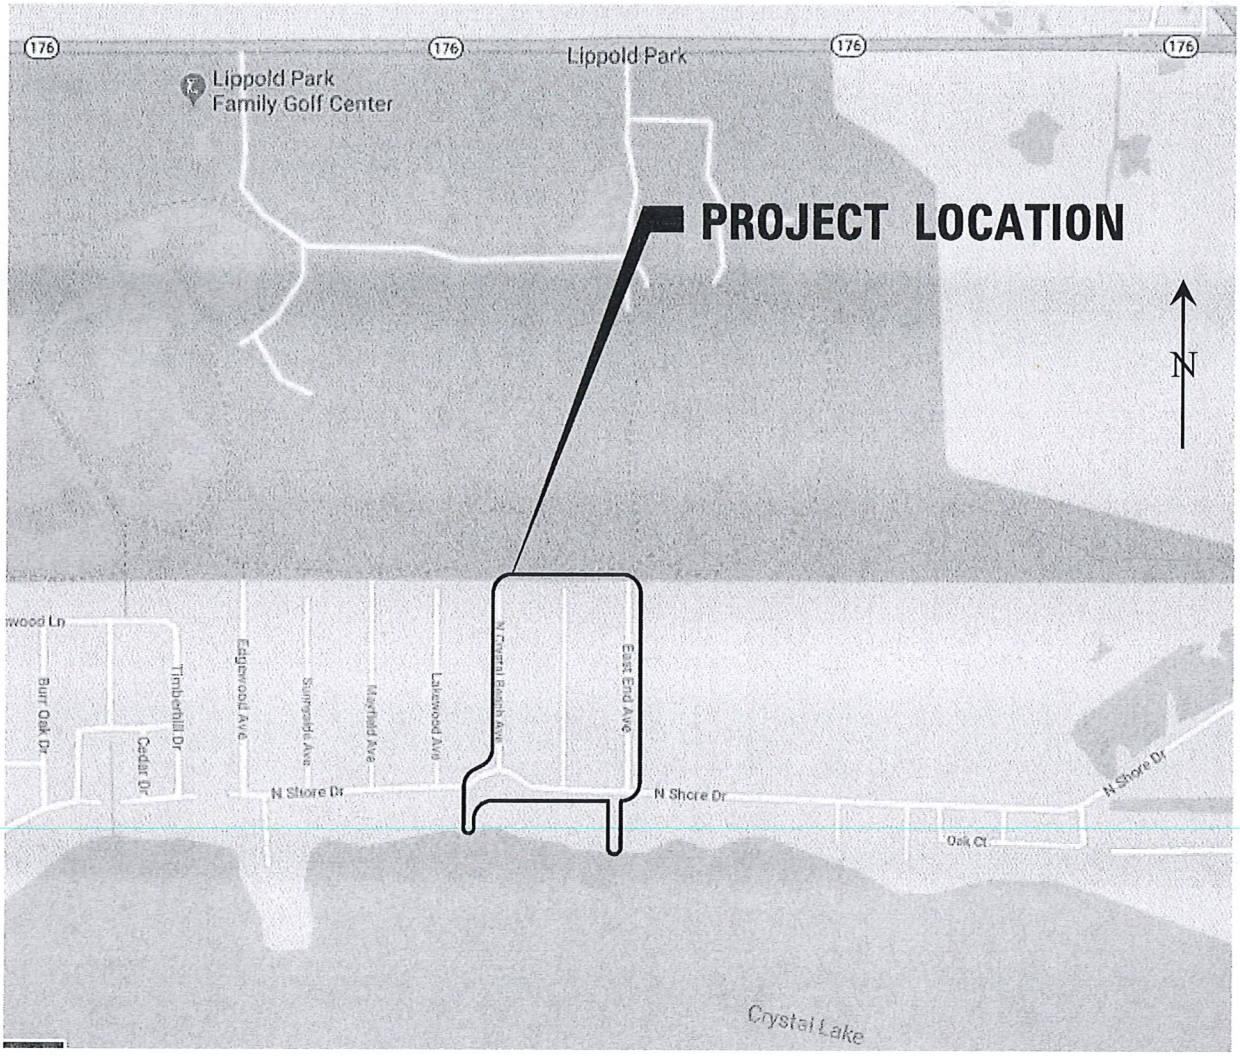

The **public meeting will be held on Monday May 13 at 7:30 pm** at City Hall, 100 W. Woodstock Street, Crystal Lake. Your participation in this meeting will ensure that your perspective and feedback are understood.

Should you be unable to attend the meeting, the City's website will be updated with any presentations and material from the meeting on May 14. Please provide any comments or concerns to the City (stormwatersolutions@crystallake.org or (815) 356-3611) no later than Wednesday May 22, 2019.

In Crystal Lake, supporting residents' quality of life while protecting the environment, is a community priority. Stormwater management is a cooperative endeavor between residents, neighborhood associations, the City, and other government entities. I look forward to your participation and thank you for your time and attention to this important matter.

Sincerely,

Michael Magnuson, P.E.
Director of Public Works
