Message From Fire Chief Craig Snyder

To the Citizens of the Communities we serve,

The Annual Community report is designed to demonstrate a summary look at our department in a varied medium with quality and easily understood information. The year 2024 was an exciting time for the department both with organizational leadership transitions, staffing additions, and increasing call volumes. This document serves not only as a year in review, but what we plan to do in the future.

Overall, 2024 seemed like a long year that went by really fast. There is so much more that I could write about, and so little page space. Please enjoy reading about all of our accomplishments detailed throughout this Annual Report, and I hope that you will join me in taking great pride in this amazing and evolving organization. Through all of the challenges in 2024, we remain actively engaged with the community as we worked to educate, promote safety, reduce risks, and provide prompt and skilled response to calls for assistance. We strive to be a great place to be as we continue to work hard, train hard, and ensure that everyone gets home safe.

Taking this annual opportunity to look in the organizational rearview mirror, it is clear that 2024 was a year of significant transitions and unexpected opportunities. As the department has continued to improve our processes, staffing, and abilities, we have remained dedicated to the citizens of our great community and to all of those whom we serve. Through it all, I have been honored to lead the members of the Crystal Lake Fire Rescue Department as we collectively upheld the Mission and Core Values of our organization.

Thank you for taking the time to review the Crystal Lake Fire Rescue Department's annual report.

Respectfully,

Craig W. Snyder, Fire Chief

Department Overview

The City of Crystal Lake is located in McHenry County, Illinois, approximately 45 miles northwest of the City of Chicago. The Crystal Lake Fire Rescue Department provides service for the City of Crystal Lake, the Crystal Lake Rural Fire Protection District, the Village of Lakewood, and portions of Lake in the Hills. The area served is approximately 51.2 square miles, with a resident population of nearly 56,000 based on the 2020 census. Services provided include fire protection, emergency medical care (Advanced Life Support), fire inspections, public education, and special team responses such as hazardous materials, dive rescue, trench, confined space, rope, and structural collapse.

The City of Crystal Lake is the largest city in McHenry County, and the Crystal Lake Fire Rescue Department's service area includes four U.S. highways, Union Pacific and Metra railroads, three large lakes (Crystal Lake and Three Oaks Recreation Area), and McHenry County College. The Department also provides automatic aid to the Nunda Rural Fire Protection District, McHenry Township Fire Protection District, Algonquin / Lake in the Hills Fire Protection District, Huntley Fire Protection District, and Woodstock Fire Rescue District. Mutual Aid is provided to communities in McHenry, Lake, and Kane Counties through the Mutual Aid Box Alarm System (MABAS).

The Fire Rescue Department provides 24-hour emergency response, operating out of three stations with 69 personnel. Staffing is provided by three shifts of full-time firefighters on a 24/48-hour schedule. Approved full-time positions include 3 Battalion Chiefs, 9 Lieutenants, and 51 firefighter/paramedics. Full-time firefighters, lieutenants and Battalion Chiefs are members of the Crystal Lake Professional Firefighters Association, Local 3926, of the International Association of Firefighters. Emergency response minimum staffing is 15 personnel per shift. Administrative staffing positions include Fire Rescue Chief, Deputy Chief, Bureau Chief of Training and Professional Standards, Bureau Chief of Community Risk Management, two Fire Inspectors of Community Risk Management, and two Administrative Assistants. In 2024, the Department responded to 7,586 calls for service, of which 60% involved emergency medical care.

Year in Review

Department Acquisitions & Updates

In 2024, the department acquired a new rescue vehicle, which specialty teams will utilize to provide emergency response services to the community. The vehicle will respond to calls requiring Dive Rescue, Technical Rescue, Hazardous Materials, and Fire Investigations. The vehicle was purchased from the La Crosse Fire Department. The department also purchased a Chevy Tahoe, which now serves as the Battalion Three response vehicle. The original Battalion Three, a Ford Transit, will be utilized by the Bureau of Community Risk Management and to respond to out-of-district fire investigation calls.

Fire Station 1 received a full kitchen renovation. The renovation started in October and finished in late November.

All three fire stations received new gear washers. New turnout gear was purchased for each firefighter/paramedic. The department also purchased new self-contained breathing apparatus (SCBA) along with a new SCBA washer.

The head end equipment for the Crystal Lake Wireless Alarm Network monitoring system was purchased in 2024. This Crystal Lake Wireless Alarm Network monitors 500+ fire alarms for businesses within the department's response area. The system integrates with the SEECOM dispatching system and provides a real time view of each radio within the departments' response area. In addition, the system will allow the Bureau Chief of Community Risk Management to monitor all fire alarms from a remote location.

2024 GEMT Payments

GEMT is a federally funded Medicaid program that was introduced to Illinois via legislation in 2019. The program allows municipalities an opportunity to collect an additional Medicaid reimbursement for ambulance services, above and beyond what the State reimburses for Medicaid claims for Emergency Transportation. In 2024, Crystal Lake Fire Rescue collected over $1 million dollars from GEMT payments.

Month	Net Collections	GEMT Payments
2024-01	$ 62,472.51	$ 1,805.80
2024-02	$ 167,927.13	$ 106,426.86

Total	$2,111,120.78	$ 1,076,079.87

Bureau Chief of Community Risk Management Chris Bedore

The Community Risk Management team is responsible for identifying and prioritizing local risks, followed by a strategic investment of resources to reduce their occurrence and impact. The Crystal Lake Fire Rescue Risk Management team aims to lower risks within a specific area of operations by implementing and evaluating strategies. The Community Risk Management team is responsible for mitigating risk by enforcing local codes, evaluating plan reviews for life safety/code compliance, and managing the process of mandated compliance reporting of life safety systems within the City of Crystal Lake and our rural boundaries. Community complaints regarding fire / life safety are managed through the Community Risk Management team. The Crystal Lake Fire Rescue Department currently follows the International Fire Code - 2018 edition with local amendments.

Inspections: Fire inspections are conducted on an annual basis by the Community Risk Management Chief, two full time inspectors and front line personnel of the Crystal Lake Fire Rescue Department to identify and correct any potential fire and life safety violations. Dedicated Community Risk Management Inspectors perform annual life safety inspections and conduct additional inspections related to permitting, occupancy, and community concerns. In conducting these inspections, the Fire Department plays a vital role in educating businesses and residents in proper fire prevention practices.

Plan Reviews: The Community Risk Management Inspectors provide a critical life safety role by conducting plan reviews on new and existing buildings with life safety and code compliance guiding the review process. This process of plan reviews helps to ensure that our community is safe in the buildings we live, work, conduct business, eat, sleep and play. Also by ensuring that our community is safe and compliant, we help to potentially drive down insurance costs for all who live and work here.

Fire Investigation: In 2024, The Crystal Lake Fire Investigation Team had 9 active members. Crystal Lake Fire Investigators responded to 15 Fires requiring a cause and origin investigation. Crystal Lake Fire Investigators took the lead on 13 Fires and provided detailed Cause and Origin reports on each. Investigators provided support on 2 Mutual Aid Fires. Investigators have partnered with community businesses, worked with McHenry County Sherriff's, Crystal Lake Police, the district and states attorney's, the Office of the State Fire Marshal, and the ATF (Alcohol, Tabaco, and Firearms).

Public Education & Community Events

One of the best ways to mitigate the severe impacts of a fire or medical emergency is to prevent them from occurring in the first place. Through public education and community engagement efforts, Fire Department personnel have been able to equip Crystal Lake residents with knowledge they can use to protect themselves and practice fire safety every day. In 2024, the department educated approximately 16,441 citizens of all ages. The department held a successful Open House event, attracting approximately 600 + attendees, gave station tours, senior safety presentations, school fire safety presentations, daycare fire safety presentations, fire extinguisher trainings, and continued our Adopt-a-Firefighter program. The department also had various opportunities to participate in community events such as National Night Out, the Crystal Lake Polar Plunge, City Parades, Johnny Appleseed, Trunk-or-Treat events, Read Across America, Lakeside Festival, and local block parties.

Bureau Chief of Training and Professional Standards Heidi Olsen

The Division of Training and Professional Standards is responsible for training the members of the Crystal Lake Fire Rescue Department to be confident, competent, and professional emergency service providers for our community. While serving the citizens, stakeholders and visitors of Crystal Lake, Lakewood, and the Rural Fire Protection District, we strive to exceed our service delivery goals by setting high standards for our professional development training, through the actions of our personnel, and through the professionalism we display.

Professional Development and Certifications

Some of the certification courses attended by Department personnel in 2024 are as follows:

- Incident Safety Officer
- Instructor I and II
- International Association of Arson Investigators Conference
- Structural Collapse Operations
- Confined Space Operations
- Hazardous Materials Incident Command
- Training Program Manager
- Advanced Technician Firefighter
- Fire Investigator
- Leadership Development and Decision Making

The Crystal Lake Fire Rescue Department continues emphasis on development of our personnel. The Bureau of Training and Professional Standards is responsible for the overall training, certification and compliance requirements outlined by organizations such as Office of the State Fire Marshal (OSFM), Occupational Safety and Health Administration (OSHA), Illinois Department of Labor (IDOL) and the National Fire Protection Association (NFPA). The primary goals for the year were to focus on initial firefighter training, officer development and specialized rescue certifications.

INITIAL FIREFIGHTER TRAINING

The fire department had three new members obtain their initial firefighter training and certifications:

Basic Operations Firefighter

Hazardous Materials Operations

Fire Service Vehicle Operations

This totaled over 1,100 hours of training for these individuals. These members along with the company continue to complete probationary training daily throughout the new recruit's probationary period.

OFFICER DEVELOPMENT

Officer development focused on state certifications and incident command training. Ten other certifications from the Office of the State Fire Marshal were achieved for following courses:

Company Fire Officer

Advanced Fire Officer

Hazardous Materials Incident Command

These members have accumulated over 500 hours of officer development for these certifications.

Incident Management was a key focus for officer development. The following courses were completed by the officers:

Blue Card Incident Command

National Incident Management System-Intermediate and Advanced Incident Command for Complex Incidents

Active Shooter Incident Management

This training focuses on the control and accountability of large scale incidents. This level of training provides the fire department officers with the knowledge, skills and abilities to mitigate hazards and stabilize the emergency scene. Two of the offers also completed the requirements to assume the role of a shift commander.

SPECIALIZED RESCUE

The department has seventeen members who are part of the MABAS 5 specialized response teams. These disciplines include emergency responses for:

- Dive
- Hazardous Materials
- Sonar
- Technical Rescue

Each discipline has minimum requirements that must be met to maintain the status of an active team member, including certifications, training hours and specific training drills.

The Crystal Lake Fire Rescue Department has 59 members that are certified as paramedics by the Illinois Department of Public Health. Each paramedic has to complete 100 hours of emergency medical training to maintain their license. These trainings are provided in house and through Northwestern Medicine on a monthly basis.

Future focus will include live fire training at an acquired structure. The Crystal Lake Fire Rescue Department secured the permit through the Environmental Protection Agency to conduct live fire training at 7625 US RT. 14, formally Flowerwood. This type of training is invaluable to the members. Additional focus will be the ongoing re-certification process for OSFM certifications and succession training through an acting company officer class.

Safety Committee

The Crystal Lake Fire Rescue Department Safety Committee continues to be an integral part of the City of Crystal Lake's overall risk management plan and program. Through the Safety Committee, management and employees can communicate safety concerns and ideas to promote a safe work environment for Department employees.

The Crystal Lake Fire Rescue Department has accomplished many things over the past year. Some of those items are as follows:

Continued quarterly driver education training

Continue to promote the Department's Behavior Observation Program

Continued practices from the IRMA site visit

Accident/Injury Investigations

The Fire Rescue Department Safety Committee conducted a total of 12 accident/injury investigations for the year 2024. The focus was determining root cause and provide recommendations to practices to reduce future incidents.

Training Bureau

Bureau Chief of Training and Professional Standards – Heidi Olsen

The Crystal Lake Fire Rescue Department continues to emphasize development of our personnel. Training requirements are outlined by several organizations such as Occupational Safety and Health Administration (OSHA), Illinois Department of Labor (IDOL) and National Fire Protection Association (NFPA). Crystal Lake Fire Rescue Department (CLFRD) personnel participated in over 14,500 hours of training in order to remain proficient in all areas of emergency operations.

In 2024, the Training Bureau has accomplished the following:

- Ice rescue training for all personnel
- Provided live fire training with Huntley and Algonquin/LITH Fire Protection Districts
- Conducted mutual aid training with Woodstock Fire / Rescue District
- Coordinated a Rapid Intervention Team (RIT) training with McHenry Township FPD
- Provide training to all fire apparatus engineers on the new Rosenbauer pumpers

These goals were able to be accomplished through the commitment, hard work, and support from Crystal Lake Fire Rescue Department personnel.

Safety Committee

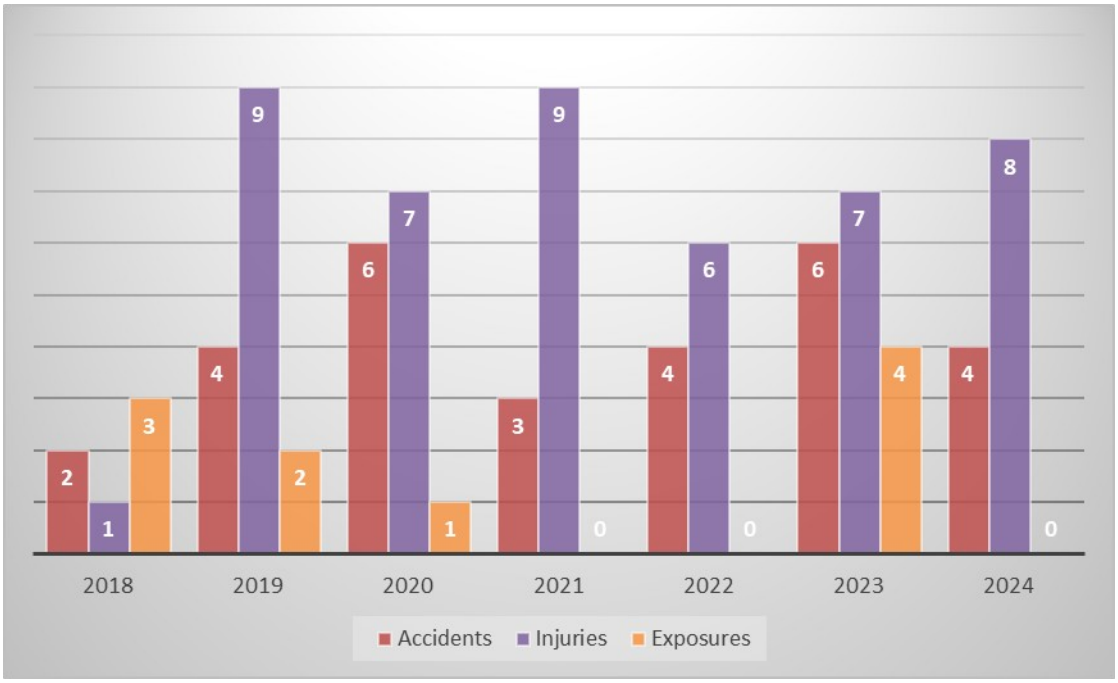

Fire Rescue Safety Officer– Bureau Chief Heidi Olsen

The Crystal Lake Fire Rescue Department Safety Committee continues to be an integral part of the City of Crystal Lake's overall risk management plan and program. Through the Safety Committee, management and employees can communicate safety concerns and ideas to promote a safe work environment for Department employees.

The Crystal Lake Fire Rescue Department has accomplished many things over the past year. Some of those items are as follows:

- Reduce the total number of preventable employee injuries by 33%.
- Continued quarterly driver education training.
- Continue to promote the Department's Behavior Observation Program.
- Promote the use of physical fitness equipment to improve personal strength and health.

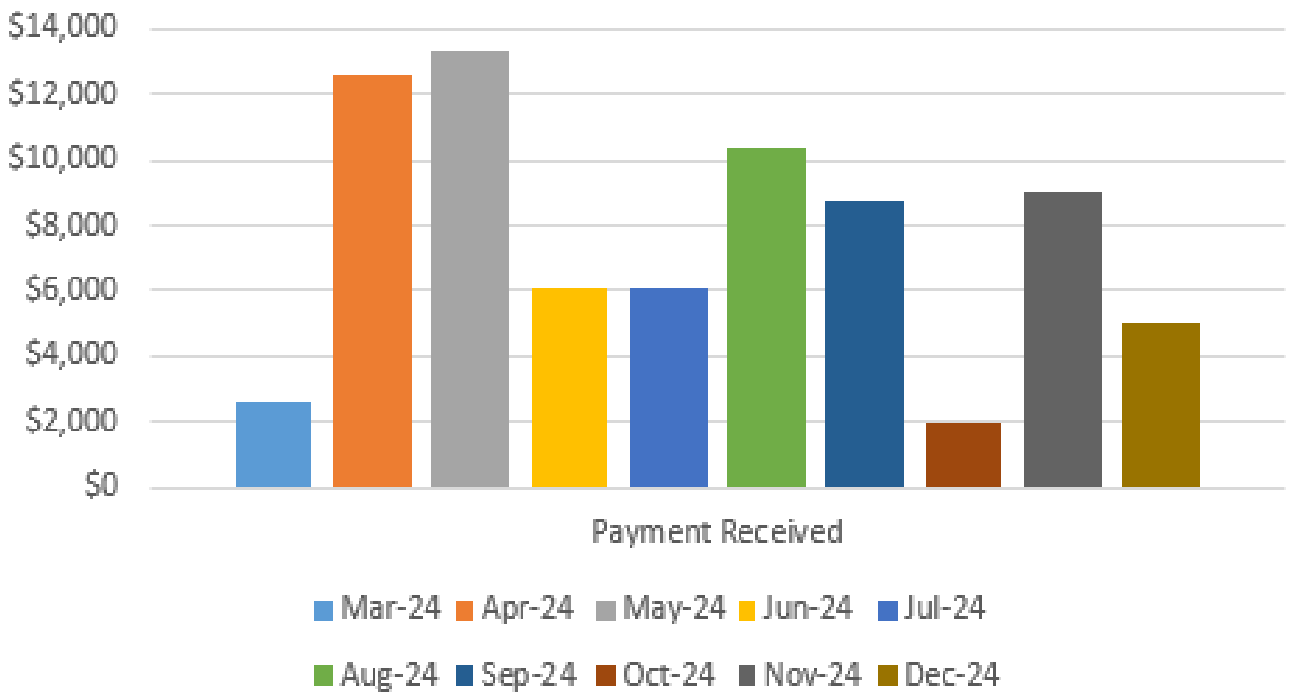

Accident/Injury Investigations
The Fire Rescue Department Safety Committee conducted a total of 12 accident/injury investigations for the year 2024. The following graph shows a comparison between previous year's accident/injury investigations:

FIRE RECOVERY USA

In February of 2024, Crystal Lake Fire Rescue resumed their business relationship with Fire Recovery USA. Following the City's Ordinance, Fire Recovery USA recoups funds from non-residents for services rendered at motor vehicle accidents, hazmat scenes and structure fires. In just 10 months, over $75,000 was collected.

Month	Payment Received
Mar-24	$2,616
Apr-24	$12,634
May-24	$13,296
Jun-24	$6,069
Jul-24	$6,117
Aug-24	$10,342
Sep-24	$8,733
Oct-24	$1,984
Nov-24	$9,074
Dec-24	$5,022

ISO Site Visit

ISO stands for Insurance Services Office (ISO), which is an independent, for-profit organization. The ISO scores fire departments on how they are doing against its organization's standards to determine property insurance costs. The City of Crystal Lake is currently an ISO 2.

How Is the ISO Score Determined?

To determine ISO rating for fire departments, the organization conducts a field survey and scores your department across four key areas using the Fire Suppression Rating Schedule (FSRS).

These areas include Emergency Communication Systems (10 points); Fire Departments, covering personnel, capabilities, training, equipment, etc. (50 points); Water Supply (40 points); and Community Risk Reduction (extra credit of up to 5.5 points).

It uses a 100-point scale (with the potential of 105.5 with the Community Risk Reduction extra credit), and the more points you score, the better your ISO fire rating.

Going Forward 2025

As the Crystal Lake Fire Rescue Department moves into the year 2025, we have several goals and projects on the horizon, including, but not limited to:

- The department will continue to address it's staffing needs and will be actively recruiting candidates to fill our vacant roles.

- In 2024, several department members attended specialized training as Youth Fire Setter Interventionists allowing the department to bring back it's Youth Fire Setter Interventionist Program in 2025.

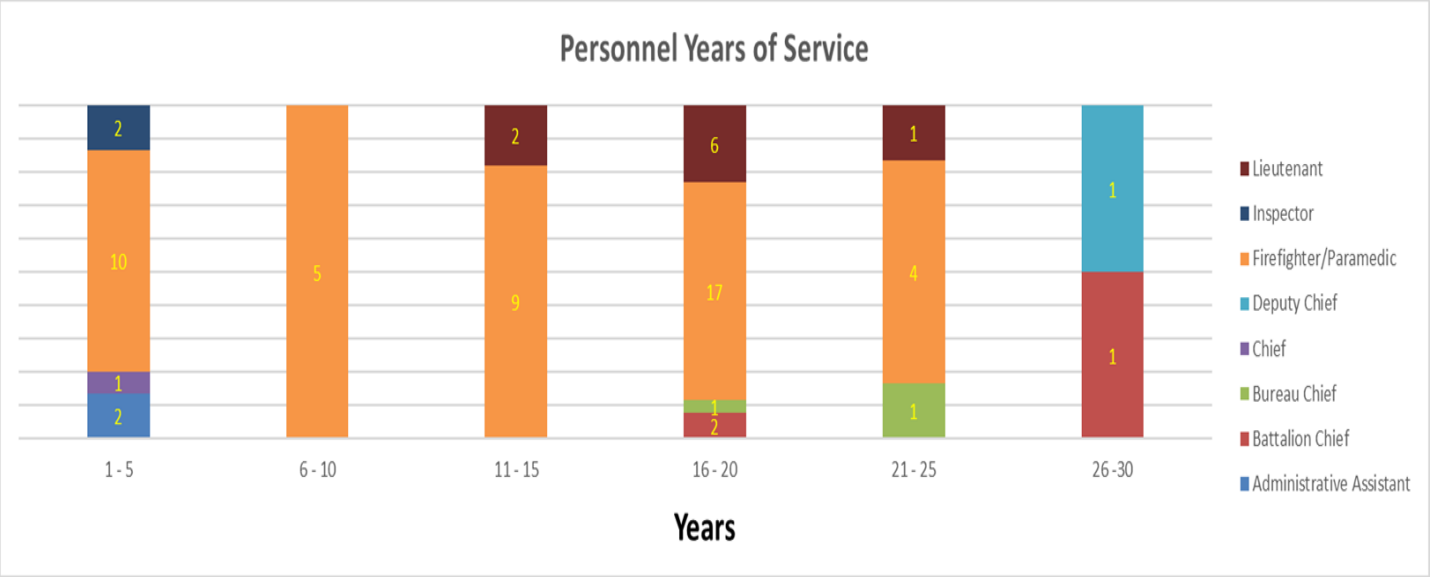

- In 2025, the Crystal Lake Fire Rescue Department will begin the process of becoming an accredited agency. This is an approximately 3-4 year project that requires several steps to be achieved. First, recognizing the growth within our community, a major goal of the accreditation process is to finalize our strategic plan that addresses our evolving needs over the next five years. Second, the department will be working on a Community Risk Assessment that addresses potential needs within the community. Lastly, the department will be creating a Standards of Cover document that encompasses the department's written policies and procedures determining the distribution, concentration, and reliability of the services we provide.

Through these initiatives, the Crystal Lake Fire Rescue Department remains dedicated to enhancing our service delivery to the Crystal Lake Community and maintaining the highest standards of safety and efficiency.

Years of Service

During 2024, The Crystal Lake Fire Rescue department did hire; four firefighter paramedics and one Community Risk Management Inspector/Investigator. The following promotions took place in 2024: One Battalion Chief to Deputy Chief, One Lieutenant to Battalion Chief and One Firefighter/Paramedic to Lieutenant. One member of the Fire department resigned .
