OWNER'S AUTHORIZATION TO ALLOW THE CITY OF CRYSTAL LAKE TO REPLACE THE EXISTING LEAD WATER SERVICE LINE AT
_____ (address),
CRYSTAL LAKE, ILLINOIS (the "Property")

A. Background/Disclosures

1. The City of Crystal Lake has developed a program to replace lead water service lines which connect properties within the City to City water mains in accordance with the Lead Service Line Replacement and Notification Act (the "Act") which is codified at 415 ILCS 5/17.12, (the "Program").

2. Maintenance of the water service line connecting the water mains of the City to individual properties is the responsibility of the property owner receiving water from the City's water main.

3. Based upon records maintained by the City, the City has determined that your home may be receiving water service through a lead service line.

4. If the City confirms that your home is receiving water service through a lead service line, it would be appropriate to replace the service line and the City will perform the replacement at no cost to you.

5. In order to carry out the replacement of the lead service line, The City will require your authorization to allow the City and its authorized employees and/or contractors to enter onto your Property including, as necessary, entry into your home to confirm the presence of a lead water service line on your property and to conduct such inspections and work as may be necessary to complete the removal and replacement of the water service line (the "Work").

6. In connection with the Work, the City will perform certain restoration work to address any disturbance to your property ("Restoration Work"), but such Restoration Work shall be limited to the following: Restoration of disturbed lawn areas, sidewalks and driveways but limited to grass (seed) replacement and asphalt or concrete patches for driveways and sidewalks. Disturbance of anything beyond lawn or driveway (bushes, flower gardens, fences, ornamental items, decorative pavers, etc.) will be the homeowner's responsibility to restore (or remove prior to installation).

7. Inside your home, the Restoration Work will include patching of the penetration hole but will not include replacing of flooring materials or drywall or paint or other wallcovering that must be removed for installation of the new water service line (anticipated to be no more than a 1 ft. square area). It should be noted that per City Code, your water meter must be accessible to the City.

8. The City will require that you grant to the City and its employees and/or contractors the right of entry, at no cost to the City, which will allow the City and its employees and/or contractors to enter upon your Property to take photographs and measurements and to pinpoint the service and meter location and to perform the Work and the Restoration Work described above.

B. Owner's Authorization.

The undersigned, as Owner[s] of the Property described above, affirm that I/we have read and understand the Background/Disclosure information set forth in Section A, above and have received and reviewed the notification required by the Lead Service Line Replacement and Notification Act attached hereto as exhibit A. I/we hereby grant authorization to the City of Crystal Lake's employees and/or contractors to enter the Property and, as necessary the home located upon the Property, in order to conduct such inspections and perform the Work and the Restoration Work described in Section A, above. I/we understand that the removal and replacement of such lead service line shall be at no cost to the undersigned and any Restoration Work to address any disturbance to the Property caused by the Work shall be limited as described in Section A, above. I/we agree to grant to the City's employees and Contractors a right of entry upon the Property and the home located on the Property for the purpose of carrying out the Work and Restoration Work described in Section A, above. I/we further agree to hold harmless, the City and its elected and appointed officials, employees and contractors, from and against any claim relating to any disturbance to the Property as a result of the Work to be performed as described above, provided that the City performs the Restoration Work as described in Section A, above.
